Personal portfolio:

GitHub page: <https://github.com/libankhalif97>

Summary:

Highly motivated and dedicated React developer seeking an opportunity to apply my skills and knowledge in a professional setting. Passionate about creating efficient and user-friendly web applications using React. Eager to contribute to a dynamic software development team and further enhance my skills.

Technical Skills:

Programming Languages: JavaScript, HTML, CSS

Web Development: React, Redux, HTML5, CSS3, RESTful APIs

Version Control: Git, GitHub

Tools: Visual Studio Code, Chrome DevTools, Postman

Testing: Jest, Enzyme

Basic Knowledge: Node.js, Express.js

Personal Projects:

Project 1: Task Management Application

Description: Built a task management application using React, enabling users to create, update, and delete tasks, as well as prioritize and filter them based on various criteria.

Technologies Used: React, HTML5, CSS3, Local Storage

GitHub Repository: [Link to your GitHub repository]

Project 2: Weather App

Description: Created a weather application using React, fetching real-time weather data from an API and displaying it in a user-friendly interface.

Technologies Used: React, HTML5, CSS3, RESTful APIs

GitHub Repository: [Link to your GitHub repository]

Project 3: E-commerce Website

Description: Developed a responsive e-commerce website using React and Redux, allowing users to browse products, add items to the cart, and complete the checkout process.

Technologies Used: React, Redux, HTML5, CSS3, RESTful APIs

GitHub Repository: [Link to your GitHub repository]

Skills and Qualifications:

Strong understanding of JavaScript, HTML, and CSS.
Proficient in React, including state management with Redux.
Experience with RESTful APIs and integrating external services into web applications.
Familiarity with version control systems like Git and GitHub.
Basic knowledge of Node.js and Express.js.
Excellent problem-solving and analytical abilities.
Strong communication and teamwork skills.
Quick learner with a passion for staying updated with the latest web development trends and technologies.

I have spent a considerable amount of time learning the basics of software development.
I have read books like head first html and css, concise guide to databases by peter lake.
I have also learnt from YouTube tutorials by code camp and crash course channels.
